EDUCATION

Amravati University | Akola, Maharashtra
Bachelor of Science (BSC); Percentage: 79.81%
K.M Asgar Hussain Jr. College
Higher Secondary

Maharashtra, India
2020 - 2022
Maharashtra, India
2018-2020

SKILLS SUMMARY

Languages: Python, JavaScript (ES6+), Data Structures & Algorithms (DSA).
Backend: Django, REST API integration, Flask, API Development.
Frontend: HTML5, CSS3, Tailwind, Bootstrap, React.js.
Machine Learning: Machine Learning(Basic).
Tools & Databases: Git, GitHub, MySQL, SQLite, Render (Cloud Deployment), PostgreSQL.

WORK EXPERIENCE

Web Developer Intern at Yasham Software Services Pvt. Ltd. | [Yasham Software](#)

June 2025 - Oct 2025

- Engineered robust REST API endpoints and architected Python Django backends for modular web applications.
- Optimized user engagement by resolving 15+ critical UI/UX issues using HTML, CSS, and JavaScript.
- Refined web applications for peak performance and stability through rigorous debugging and testing.
- Cultivated clean coding practices while collaborating effectively within a cross-functional technical team.
- Streamlined data management by developing RESTful APIs that handled CRUD operations for 3+ core modules.
- Architected scalable backend structures and enhanced database query efficiency for faster response times.

PROJECTS

Hospital Management System | [Hospital Management System](#)

- Architected a comprehensive full-stack management platform utilizing Django, handling intricate data relationships for medical staff and patient records.
- Fortified system security by implementing Role-Based Access Control (RBAC), ensuring strictly authorized data access across different user tiers and improving data privacy for 100+ user records.
- Deployed on Render using Whitenoise for production-grade static file handling and environment management.
- Designed a modern, responsive UI with whitespace-optimized layouts using advanced CSS techniques.

KisanSat Platform | [KisanSat](#)

- Created a data-driven web application using Python and Django for scalable backend performance.
- Integrated REST APIs to facilitate seamless, real-time communication between client and server.
- Structured efficient MySQL database schemas for high-performance data management, reducing data retrieval time by 25%.
- Planned interactive, responsive frontend components with a focus on cross-device compatibility.
- Refined application logic through rigorous debugging and performance tuning to eliminate bottlenecks.

Personal Portfolio Website | [Portfolio](#)

- Expanded a responsive personal portfolio website using React.js.
- Developed reusable UI components and interactive layouts.
- Integrated project showcases and GitHub links for work samples.
- Executed responsive design using HTML, CSS, JavaScript and React.js

CERTIFICATES

Web Development Internship Certificate | [CERTIFICATE](#)

Demonstrated the ability to build responsive React interfaces, optimize component performance, and collaborate effectively to deliver scalable frontend solutions.

React.js Course Completion Certificate Program | [CERTIFICATE](#)

Gained hands-on experience in React.js by developing interactive and component-based web applications. Built dynamic and responsive user interfaces using modern web technologies.

Introduction to Artificial Intelligence | [CERTIFICATE](#)

Acquired a foundational understanding of Artificial Intelligence concepts, including natural language processing and real-world AI applications.
